

ILLUMA STEP

- Illuminates the area directly around the vehicle for safer entry and exit and makes the vehicle more visible to others in low light situations
- LED lights are available with clear or amber lens that meet or exceed SAE and DOT specifications
- LED lights are used for extended product life with low current draw
- Vehicle specific bracket system provides for a no drill installation and a perfect fit
- 6" wide step for safe and secure foot placement
- Available in Powder Coated finish or a bright 304 non-directional Stainless Steel for superior corrosion resistance
- Santoprene TPE step material offers exceptional slip resistance in all weather conditions and is resistant to most chemicals
- End caps are molded from an external automotive grade ABS for durability and are fitted to enhance the finished look
- Extruded 6063-T5 aluminum substraight for added strength
